

Privacy Film 80-micron – Opal Frost

Opal Frost Privacy film is one of our best sellers and provides a simulated frosted glass effect with a soft translucent appearance, for application to glazing, converting existing plan glass into privacy glass allowing 66% of the light through but not prying eyes. The monomeric calendered film and solvent based pressure sensitive acrylic adhesive allows virtually trouble free maintenance and can often be installed in less that a day, resist fingerprints and can be cleaned as you would any other window.

Opal Frost film provides a medium level of opacity.

Opal Frost film will allow the benefits of utilising glazing without laying bare for all to see and the people and contents within.

Opal Frost film allow natural light to remain without making the room feel dark and claustrophobic.

Opal Frost film has a scratch proof coating and a 7 year Manufacturers warranty.

Performance Data	
Total Solar Energy	
Transmitted	63%
Reflected	12%
Absorbed	25%
Visible Light	
Transmitted	66%
Reflected	8%
Ultra-Violet Transmission	<2%
