

Super Shade 20

High quality super shade 20 has a discreet, neutral appearance and low reflectivity and provides good results whilst enhancing a buildings appearance.

Super Shade 20 solar control film installed by Able Install offers good heat rejection and is of particular use in combating severe solar heat gains and glare problems.

Super Shade 20 window film can also provide additional benefits such as daytime one-way privacy, uniform outside appearance and as with most window films installed by Able Install, can stop up to 99% of ultraviolet light (UV).

These films help to reduce cooling costs and therefore energy costs too by lightening the load on fans and air

conditioning equipment. Government and business organisations can use Able Install solar control window films as an integral part of seeking to comply with the Carbon Reduction Commitment scheme and The Carbon Trust policies.

They also help to alleviate the discomfort caused by excessive heat and by glaring reflections off computer screens, assisting in compliance with the Workplace (Health, Safety and Welfare) Regulations.

Features	Benefits
Good solar heat and glare rejection	Alleviate the discomfort caused by excessive heat and glare
Cuts energy use for cooling	Reducing energy tax liability and contributes to a reduced carbon footprint
Also suitable for tinting vehicle windows	Increased privacy from outside looking in
Quick, retro-fit installation	Can be used where costly and disruptive large-scale replacement of existing glazing is not a viable option
Scratch-resistant	Suitable for most non-abrasive window-cleaning methods
Screening of harmful UV rays	Reduced fading of interior furnishings

Performance Data	
Total Solar Energy Rejected	58%
Solar Energy Reflected	16%
Solar Energy Absorbed	63%
Solar Energy Transmitted	21%
Visible Light Transmitted	21%
Visible Light Reflected	13%
Ultra Violet Light Rejected	99%
Shading Coefficient	0.49
Solar Heat Gain Coeff. (g Value)	0.42
Emissivity	-
Glare Reduction	76%
